

ANCHORS NEWS

New Stainless Steel Hammerfix from Evolution

Evolution Fasteners (UK) Ltd have today launched their new Stainless Steel Hammerfix range to further expand their light anchors range. Available in M6 and M8 diameters, 40mm - 100mm lengths, these new fixings are in stock now.

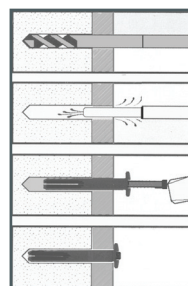

Product Code	Description
SSHS640	6 x 40mm stainless steel hammerfix (200)
SSHS660	6 x 60mm stainless steel hammerfix (200)
SSHS860	8 x 60mm stainless steel hammerfix (100)
SSHS8100	8 x 100mm stainless steel hammerfix (100)

Why use Stainless Steel Hammerfix?

We put this question to Evolution's Technical Manager who said:

- The A304 grade stainless steel screw is ideal for internal and external construction work e.g. for use in humid areas and outdoor constructions where superior corrosion resistance is required.
- Time saving application with pre-assembled screw and plug
- Fully removable
- Simple, tough anchor for quick through fix installation into solid masonry.

Installing Stainless Steel Hammerfix

1. Drill a hole through the part to be fixed
2. Insert the anchor as deep as possible
3. To set the anchor, tap the screw or use a screwdriver to screw the insert until the screw head comes into contact with the flange of the nylon sleeve

For Free Samples or More Information...

Evolution believe in the quality of their products and do not expect customers to take their word for it. They offer free samples to allow customers to try products for themselves. Free samples of the new stainless steel hammerfix can be requested by contacting Evolution's Sales Team.

Evolution's Sales and Technical Teams are also just a phone call away for further information on the stainless steel hammerfix range, or indeed any of their other ranges.
